**Bottled Water Industry**

A guide to products and services
Focused on adding value to your business
Improving quality and control

Supported by innovative products, state-of-the-art technical facilities and a specialized international team, Parker domnick hunter's capability is based on understanding the specific needs of your business and providing a total solution.

Delivering value from source to bottle

The Purecare programme represents a philosophy-driven bottled water-processing to review and manage your entire process. The Purecare package incorporates up-front consultation and assessment to establish your overall goals as well as a range of after-sales packages that ensure the Parker domnick hunter solution is working at maximum efficiency. Parker takes into account all aspects that affect your process, making small changes that can lead to big results.

Commitment to process improvements

Our goal is to continually improve your productivity, reduce your process costs and ensure the safety of your final product. Parker domnick hunter commits to your goals through Purecare, providing total confidence by way of up-front consultation and after-sales support packages:

- Continued investment in research and technology
- Application driven approach to new products
- Market and geographical experience leading to informed solutions
- Global network providing technical, service and sales support
- Excellent reputation gained through work with the world’s leading bottled water producers
- Highly skilled, experienced and trained employees

Purity that goes beyond filtration

Delivering solutions that support quality in every aspect of your process makes us a truly unique supplier who can deliver complete protection of your liquid and gas applications enabling you to have confidence and assurance in the quality of your final product.

Global support

Part of the $3 billion Parker Hannifin corporation, we have subsidiaries in 26 countries and work with nine manufacturing locations, so we can offer you truly global support with a local perspective and expertise.

Purecare takes into account all aspects that affect your process, making small changes that can lead to big results.

Fiber Integrity Testing

Changing the point of entry of any fiber, is a fundamental improvement of your Critical Control Point (CCP). Parker domnick hunter provides a range of test options to fit that purpose. The test will verify the quality of the product that meets the customer's expectations. Parker domnick hunter provides a range of test options to fit that purpose. The test will verify the quality of the product.
Supported by innovative products, state-of-the-art technical facilities and a specialized international team, Parker domnick hunter’s capability is based on understanding the specific needs of your business and providing a total solution.

Purity that goes beyond filtration

Delivering value from source to bottle

Extruded Activated Carbon Filters
- PES membrane
- Extend life of membrane filters
- PREPOR range of prefilters
- Available in large format diameters
- Polypropylene media

Carbon & Odour Removal
- Chlorine & odour removal
- Extruded activated carbon filter
- Downstream filters
- Protects equipment & downstream processes

Nitrogen Generation
- Consistent flow, pressure and purity
- Preventive maintenance programmes
- Help to identify seasonal trends
- Refrigeration dryers

Extended warranty programs
- Applications include:
  - Cost saving of up to 90%
  - BEVCHECK PLUS - Pressure decay testing of membrane filters
  - Generate your own nitrogen
  - Periodic testing to monitor seasonal trends
  - Water separators
  - Global support network

Disc trial carried out over 15 minutes

Global support
- Part of the $10 billion Parker Hannifin corporation
- We have subsidiaries in 25 countries and a global manufacturing locations, so we can offer you truly global support with a local perspective and expertise.

Committed to process improvements
- Our goal is continually improve your productivity, reduce your process costs and ensure the safety of your final product. Parker domnick hunter commitment to your goals through Purification, providing total confidence by way of up-front consultation and after-sales support packages:
  - Continued investment in research and technology
  - Application driven approach to new products
  - Market and geographical experience leading to tailored solutions
  - Global network providing technical, service and sales support
  - Excellent reputation gained through market and geographical experience
